

PRESS RELEASE

December 8, 2005

FOR IMMEDIATE RELEASE

New Wireless IV Pump Monitoring Device

The new RN+ IV Alert Wireless System, by Nurse Assist, brings infusion pump alarms to a dedicated wireless console at the nurses station. IV pump alarms which may not be heard due to distance or low staffing levels are wirelessly transferred to the nurse's station and all nursing staff can immediately know and respond when intravenous administration is required. Healthcare facilities can provide a greater level of patient safety with the use of the new RN+ Wireless System. The RN+ IV Alert is available for most infusion pumps with nurse call interface configurations.

For more information, contact Nurse Assist at 800-649-6800.
